Professional Summary

Computer Science & Design undergraduate with a strong academic record (CGPA 8.32/10.0) and expertise in Data Structures, Algorithms, and UI/UX. Proven ability to build full-stack AI applications and lead technical teams. Passionate about bridging the gap between functional backend logic and intuitive user interfaces. Seeking to leverage Python, SQL, and Product Design skills in a challenging internship.

Education

Rajalakshmi Engineering College *Expected May 2028*
Bachelor of Engineering in Computer Science & Design — CGPA: 8.32/10.0 *Chennai, India*
Coursework: Data Structures (A+), Algorithms(A+), DBMS, UI/UX Design, Graphic Designing

Technical Skills

Programming Languages: Python, C, SQL, HTML, CSS
Frameworks & Libraries: Flask, Django (Basic), Streamlit, NumPy, OpenCV, MediaPipe, YOLOv8
Databases: Oracle, MongoDB, SQLite3
Cloud & DevOps: Microsoft Azure, Git, GitHub, Version Control, CI/CD Fundamentals
Software Engineering: REST APIs, Software Testing, Object-Oriented Programming (OOP), Data Structures & Algorithms
Design & Creative Tools: Figma, Adobe Illustrator, Blender, MATLAB, Fusion 360
Soft Skills: Problem Solving, Technical Leadership, Research, Team Collaboration, Adaptability

Projects

Multimodal Deepfake Detection Engine — *Python, OpenCV, MediaPipe, YOLOv8* *present*
- Engineered a real-time deepfake and proxy detection system using a multimodal fusion pipeline combining **5 independent signals** — Eye Aspect Ratio, Mouth Aspect Ratio, Laplacian texture analysis, Visual Speech Recognition, and BioVeto.
- Designed a signal fusion architecture achieving robust detection across video, audio, and facial biometrics, with potential deployment as a browser extension, REST API, and edge SDK.

Edumate – Student Companion App | *UI/UX Design, Figma* *Nov 2024*
- Designed high-fidelity mobile application interface to streamline academic management for engineering students.
- Created intuitive user flows for real-time attendance tracking, dynamic timetabling, and a "CollegeBot" AI assistant.
- Prototyped a "Club & Community" module to boost student engagement in extracurricular activities and hackathons.

Low-Cost Radio Telescope | *SEDS Club Project* *Present*
- Collaborating with a technical team to engineer a low-cost Radio Telescope for celestial object detection.
- Focusing on signal processing and hardware integration to reduce equipment costs while maintaining detection accuracy.

Leadership & Activities

Technical Team Associate *Rajalakshmi Engineering College*
SEDS Club (Space Exploration & Development of Students) *Aug 2024 – Present*
- Contributed to hardware selection and simulation research for the radio telescope project.
- Organized and conducted a technical quiz event for **350+ participants**, managing logistics and content creation.

Research Team Lead *Rajalakshmi Engineering College*
BIC Club (Blockchain Innovation Club) *Nov 2024 – Present*
- Spearheaded research coordination, improving project documentation and communication protocols.
- Managed workflows across **5+ student research teams**, ensuring timely project deliverables.

Joint Secretary *Rajalakshmi Engineering College*
Designix Club *April 2025 – Present*
- Managed and Coordinated 7+ teams, improving efficiency and communication

Certifications

- MongoDB Certification
- Oracle AI Foundations
- Microsoft GenAI
- NPTEL: IoT (Internet of Things)
- NPTEL: Business Fundamentals for entrepreneurs
- NPTEL: Business Start to Scale
