COMPANY NEWS · 2026

— CHENNAI · CAYMAN ISLANDS

From Classroom to Real-World Impact

Inside Longshore Labs' four-week internship programme — where two engineering students joined a live compliance data initiative, mentored across Chennai and the Cayman Islands.

— PROGRAMME OVERVIEW

A four-week internship, measured in real work — not busywork.

4

Week intensive programme

Full-time, in-office collaboration between Chennai and Cayman teams

2.1M

Records in the live dataset

A real compliance data initiative — not a simulated exercise

Locations, one project

Chennai development centre & the Cayman Islands

CHENNAI ● ● CAYMAN

— MEET THE INTERNS

Two students from Rajalakshmi Engineering College, Chennai.

Dhanesh

TECHNOLOGY INTERN

Strong technical intuition and a knack for turning project requirements into well-structured documentation. Confident with modern AI tools and large-volume data workflows.

Muhilan

TECHNOLOGY INTERN

Approached problems from both technical and practical angles. Quickly grasped the broader compliance and governance context, and communicated progress clearly across teams.

— THE PROJECT

2.1 million records. One fragmented problem.

Relevant public information is often scattered across sources, published in inconsistent formats, and difficult to search, compare, or evaluate. Dhanesh and Muhilan helped turn that fragmentation into a structured dataset — through careful collection, classification, standardisation, validation, and deduplication.

> "The long-term vision is a reliable, reusable information service — helping institutions identify compliance, legal, sanctions, and reputational risk more efficiently."
>
> LONGSHORE LABS

— MENTORSHIP, CHENNAI ↔ CAYMAN

It takes a cross-border team.

Praveen Kumar

TECHNICAL MENTOR · CHENNAI

Direct technical mentoring throughout — guiding the interns on MongoDB, data quality practices, and documentation standards.

Lenin Kumar

HEAD OF PRODUCT · CAYMAN ISLANDS

Overall project direction, career guidance, and feedback — connecting the internship to Longshore's broader strategic objectives.

Dhiba

HEAD OF OPERATIONS · LONGSHORE LABS

Facilitated the internship and coordinated the opportunity with Rajalakshmi Engineering College.

Dr. P. Revathy

PROFESSOR · RAJALAKSHMI ENG. COLLEGE

Supported the interns in understanding and navigating professional working practices.

— PRACTICAL LEARNING

More than code.

Successful technology solutions need more than software — a clear understanding of the problem, reliable data, and responsible information management.

MongoDB
Large-volume datasets
Business requirements
Technical documentation
Data collection & structuring
Data quality & deduplication
Data validation
AI research tools
Cross-location collaboration
Compliance context
Governance frameworks
Professional communication

— THE NEXT CHAPTER

Both interns want to keep building this with us.

01 Enriching and validating the collected information

02 Improving data quality, accuracy, and consistency

03 Identifying and removing duplicate records

04 Strengthening search and screening capabilities

05 Developing the dataset into a reusable compliance information service

A further internship or academic project is possible around **December 2026 or January 2027**, subject to Dhanesh and Muhilan's academic schedules.

— THANK YOU

Congratulations, Dhanesh & Muhilan.

Thank you to Praveen Kumar, Parthiban, and Lenin Kumar for their mentorship; to Dhiba for facilitating the programme; and to Dr. P. Revathy and Rajalakshmi Engineering College for their continued commitment to shaping talented young professionals.

Building the infrastructure of modern financial regulation and governance.
